Better Products • Better Prices • Better Service

BPS 4B100 Vacuum Sealer

Features

- Integrated clincher allows the BPS 4B100 to reach high production capacity while maintaining high seaming quality.
- One seaming station can accommodate up to 100 cans per minute.
- Roller feeding is controlled by a cam mechanism, and can handle can diameters ranging from 50mm to 100mm.
- Proximity switch automatically controls cap supply.
- Automatic shut-off provides additional safety in event of seamer overload or any other breakdown.
